We are inviting students to apply for Master’s projects in the Barz group:

You are interested in:
- Integrated quantum optics
- Single-photon sources and detection
- Quantum information processing
- Quantum algorithms, quantum computing, quantum networks
- International collaborations
- Interdisciplinary research at the intersection of physics, engineering, computer science, mathematics

We are looking for:
- Excellent students with a background in physics, photonic engineering, or related
- Ideally experience in experimental (quantum) optics and quantum information processing
- Programming skills (Matlab, Mathematica, ...)
- BSc (or equivalent) in physics, engineering, or related

For more information, please contact Prof. Dr. Stefanie Barz
